

Sheet-metal and wiring solutions from Baumüller

Dravinja provides system solutions for everything from customer-specific sheet-metal parts to fully-wired electrical equipment.

Added value

- Design functions as a distinguishing feature
- Special solutions: individual, not run-of-the-mill
- From individual components to mass production
- Prototype construction
- Outsourcing: from the manufacturing process to cost optimization
- The latest machinery
- High design quality, on-time delivery
- ISO 9001:2000 certification
- Sheet metal and wiring from a single source

Products/Solutions

- Machine cladding: visually appealing and adapted to the machine
- Housing chassis for the electronics industry
- Control center panels
- Special-design control cabinets
- Wired switchgear
- Special construction as per customer request

Services

- Design consulting
- Planning, development, construction: Pro-E, STEP, IGES, PDF, DXF
- Sheet-metal working: stamping, bending, welding, riveting, molding etc.
- Powder coating: textured or smooth, color as per customer request
- Surface treatment: anodizing, coating, laminating, screen printing etc.
- Final installation: assembly and pre-installation
- Serial wiring: based on provided wiring diagrams, including cable manufacture
- Shipment: packaging and logistics as per customer request
