

AT A GLANCE

**Baumüller at a glance –
Leading manufacturer of electric automation and drive systems**

Our automation and drive systems ensure maximum efficiency – whether through highly dynamic and precise servo technology in mechanical engineering or in energy-efficient mobility solutions for the future.

Automation - control platforms

With the b maXX control units, you can consistently implement the concept of scalability and modularity for flexible and individual adaptation to today's mechanical engineering requirements. Depending on the application, we support you during the development of central, modular decentralized and hybrid control architectures.

The control platforms are also suitable for highly synchronous drives and are completely integrated in the ProMaster engineering framework.

b maXX servo drives

With its converters, Baumüller provides its customers with important advantages: From cost savings to higher dynamics to increased safety.

Together, the converter series of the b maXX family cover a wide power range up to 400 kW. The b maXX family includes both stackable devices and powerful mono units. With optional safety packs, all devices in this series can be easily adapted to meet your individual safety needs.

Motors

You are looking for the right motor for your application? We offer you a wide portfolio of motors from 0.3 to 530 kW. Depending on your requirements, we equip your plants or your mobile application with disk motors, dynamic three-phase motors, high-torque motors or if necessary, direct current motors also.

BAUMÜLLER AT A

The comprehensive all-in-one package for your machines and installations: Lifecycle management of Baumüller

Engineering and switching systems

Service throughout the whole lifecycle: From the projecting and system design phase to engineering services, customer-specific switching systems and commissioning service. Throughout the whole lifecycle of your system we ensure the reliability and productivity of your machine by providing a wide range within the fields of commissioning, maintenance and retrofitting.

GLANCE

Sheet metal working / control cabinet construction

For many years, we have been implementing custom solutions for renowned machine and plant manufacturers – from sheet metal parts to completely wired control cabinets. You receive everything from us, a single source that can therefore deal optimally with your needs and wishes.

**Planning | design | sheet metal production |
serial production | assembly | installation**

Installation and relocation

We ensure your competitiveness by providing industrial installation, relocation, commissioning, mechanical production, piping construction and special machinery – every day and throughout the world. We are intersectoral and flexible on duty and implement all project steps from planning to the final inspection for you with professional experts – and it doesn't matter if it's an individual machine or an entire company.

Service / Retrofit / drive modernization

With our services we support maintenance personnel, who are responsible for the smooth running of machines and plants every day, in all topics of industrial maintenance – and regardless of the manufacturer.

Regardless of the manufacturer, we offer you tailored and multi-level solutions for the modernization of your electrical drive systems.

Electronic manufacturing service

As we are a competent partner for electrical services, we realize your entire process including project management, production, mounting, packaging, logistics and after-sales services.
